myQ Garage Door Opener — Setup, App and Fixes

Garage Door Hub • garagedoorseohub.com • Know the Cost. Find a Local Pro. • November 2026

Set up myQ in 11 steps

1. Download the myQ app, create an account, verify your email.
2. Tap Settings > My Devices > Add a new device.
3. Tap Garage Door Opener; pick ceiling or wall motor.
4. Pick the reason the app asks for; tap Continue.
5. Turn on Bluetooth when the app asks; tap Get Started.
6. Tap No — the opener was not connected before.
7. Pick the wall control shown; press its button.
8. Press the Learn button on the motor when told to.
9. Tap Yes when you hear a beep and see the blue light blink.
10. Pick your 2.4 GHz Wi-Fi network, enter the password, wait for green.
11. Name the opener, tap Finish, test open and close.

LED meanings — read the light before you reset anything

Blinking blue: ready for setup. Solid blue: joining Wi-Fi.

Blue + green flashing: cannot reach the router.

Blinking green: cannot reach myQ servers. Solid green: online.

No light: check power, outlet and breaker first.

Retrofit hub vs replace the opener

Smart Garage Control hub: $64.99 (Chamberlain, Nov 2026). DIY, 30-45 min. Best when the opener works and was made after 1993.

New Wi-Fi opener installed: about $480 for a 3/4 HP belt drive (Fixr, Nov 2026). Best when the opener is over 15 years old, loud, or failing.

Voice control — what works

Alexa: no direct control. Google Assistant action ended June 2023.
IFTTT can still CLOSE the door only — it can never open it.
